

Reducing Fractions - Part 1

✓ Means finding a fraction with a smaller
numerator and denominator

✓ Divide by the same number

$$\begin{array}{ccc} \textcircled{2} & \div & \boxed{2} \rightarrow \textcircled{1} \\ \textcircled{4} & \div & \boxed{2} \rightarrow \textcircled{2} \end{array}$$

$$\begin{array}{ccc} \textcircled{3} & \div & \boxed{3} \rightarrow \textcircled{1} \\ \textcircled{6} & \div & \boxed{3} \rightarrow \textcircled{2} \end{array}$$

$$\frac{6}{9} \div \boxed{3} = \frac{2}{3}$$

$$\frac{\textcircled{5}}{\textcircled{15}} \div \frac{5}{5} = \frac{\textcircled{1}}{\textcircled{3}}$$

$$\frac{7}{21} \div \frac{7}{7} = \frac{1}{3}$$
