

Name: _____

Score: _____

GED Skill: Solving Numerical Expressions

Solve the following numerical expressions.

Sometimes you will be given a word problem and you must first use the information to write a numerical expression... before you solve the problem. Replace the words with numbers and math operations before you evaluate the expression. When solving it be sure to follow the correct order of operations.

- ① _____ Twice a number is 8. What is the number?
- ② _____ The difference of a number and seven is equal to 2. What is the number?
- ③ _____ The quotient of a number and two is 3. Find the number.
- ④ _____ 24 is equal to the product of four and some number. Find the number.
- ⑤ _____ The product of six and a number is 42. What is the number?
- ⑥ _____ Six is equal to the quotient of a number and 2. Find the number.
- ⑦ _____ Twice a number is 4. What is the number?
- ⑧ _____ The difference of a number and four is equal to 2. What is the number?
- ⑨ _____ The quotient of a number and four is 4. Find the number.
- ⑩ _____ 27 is equal to the product of nine and some number. Find the number.
- ⑪ _____ The product of ten and a number is 70. What is the number?
- ⑫ _____ Five is equal to the quotient of a number and 7. Find the number.
- ⑬ _____ Twice a number is 6. What is the number?
- ⑭ _____ The difference of a number and two is equal to 5. What is the number?
- ⑮ _____ The quotient of a number and three is 5. Find the number.
