GED Skill: Solving Numerical Expressions

Solve the following numerical expressions.

Sometimes you will be given a word problem and you must first use the information to write a numerical expression... before you solve the problem. Replace the words with numbers and math operations before you evaluate the expression. When solving it be sure to follow the correct order of operations.

- ① _____ The difference of a number and seven is equal to 2. What is the number?
- ② _____ The quotient of a number and nine is 3. Find the number.
