GED Skill: Solving Numerical Expressions

Solve the following numerical expressions.

Sometimes you will be given a word problem and you must first use the information to write a numerical expression... before you solve the problem. Replace the words with numbers and math operations before you evaluate the expression. When solving it be sure to follow the correct order of operations.

- ① _____ The product of ten and a number is 30. What is the number?
- ② _____ Twice a number is 6. What is the number?
- ③ _____ The quotient of a number and three is 7. Find the number.
- ④ _____ The product of five and a number is 25. What is the number?
- ⑤ _____ Twice a number is 6. What is the number?
- ⑥ _____ The quotient of a number and five is 7. Find the number.
- ⑦ _____ The product of seven and a number is 14. What is the number?
- ⑧ _____ Four times a number is 8. What is the number?
- ⑨ _____ The quotient of a number and ten is 2. Find the number.
- ⑩ _____ The product of three and a number is 21. What is the number?
- ⑪ _____ Four times a number is 8. What is the number?
- ⑫ _____ The quotient of a number and eight is 7. Find the number.
- ⑬ _____ The product of ten and a number is 60. What is the number?
- ⑭ _____ Four times a number is 8. What is the number?
- ⑮ _____ The quotient of a number and three is 7. Find the number.
- ⑯ _____ The product of nine and a number is 36. What is the number?
- ⑰ _____ Twice a number is 4. What is the number?
- ⑱ _____ The quotient of a number and two is 8. Find the number.
- ⑲ _____ The product of seven and a number is 21. What is the number?
- ⑳ _____ Twice a number is 4. What is the number?
